something would be done and the Government would immediately start attending to all these aspects.

After the Pokhran tests, Indian scientists were pushed out from many countries and particularly, from the United States. My impression is that all of them have not yet been rehabilitated. Government has been publicly saying that rehabilitation has been done doors have been kept open for those who have come back or want to do so. I know three or four of them well, personally. The other day I met two of them and they were complaining that though the Government had publicly announced that they would rehabilitate the scientists who have been pushed out from the United States and other countries, it is not being done.

I would not like to make a reference to the steel city of Rourkela in my State, Orissa. Hindustan Steel have a steel plant in Rourkela. It came into existence with the support of Germany and a beautiful steel plant had been built up. In the initial years, it was making a huge profit. Many satellite industries grew up around the steel mill. About a thousand industries, small and big, had come up. Of late, the steel plant has been losing about Rs. 2 crores a day. Now most of these satellite industries have been closed down. The Minister of Steel comes from my State and it should have been his headache and concern to set things right. The other day I saw a newspaper report saying that something is being done. Once the satellite industries are closed down, and the people go away, the steel city would suffer an irreparable setback and the people will be totally disenchanted. It would, again, be difficult to put things together. It is the same story of humpty-dumpty. Unless timely action is taken, it would really be difficult to revive Rourkela. These are matters which should have received attention. If timely steps are taken, probably, a lot of things can improve and we can have cohesion restored.

On the whole, I must say that the Address, does not give the confidence to us that Government would be able to handle the problems as expected of it. I, would say that I am not happy with the Address and the lines that have been indicated by the hon. President are totally inadequate.

THE VICE-CHAIRMAN (SHRI T.N. CHATURVEDI): Thank you.

Hon. Members, now, the Railway Minister is here with us and he will lay the Budget (Railways), 1999-2000. Shri Nitish Kumar.

THE BUDGET (RAILWAYS), 1999-2000

THE MINISTER OF RAILWAYS (SHRI NITISH KUMAR): Sir, I beg to lay on the Table a statement (in English and Hindi) of the estimated receipts and expenditure of the Government of India for the year 1999-2000 in respect of Railways.

[Placed in Library. *See* no. LT-2427/99]

THE VICE-CHAIRMAN (SHRI T.N. CHATURVEDI): Now, Shri Nitish Kumar. *(Interruptions)*. I am sorry. Shri Sanatan Bisi. I think the Railway Budget is too much with us. We also want to know a lot of things.

MOTION OF THANKS ON PRESIDENT'S ADDRESS— Contd.

SHRI SANATAN BISI (Orissa): Mr. Vice-Chairman, Sir, while speaking on the Motion of Thanks to the President for his Address, I will deal mostly with Articles 356, 257 and 258 and the character of political Governors. Sir, our hon. President, Shri K.R. Narayanan, has said in a function held on the 50th Anniversary of the First Meeting of the Constituency Assembly, "Today, Indian politics is facing a crisis of values and crisis of standard of behaviour".

Sir, with your permission, I would deal with paragraph 59 of the President's Ad-
